CAREER OBJECTIVE

Creative Full-Stack Developer skilled in Python (Django), JavaScript (DOM), and MySQL. Experienced in cloud deployment on Render and data visualization using Matplotlib/Plotly. Passionate about building interactive, beautiful UIs. Seeking an internship to contribute while expanding into React, Node.js, and MongoDB.

WORK EXPERIENCE

Freelance Full-Stack Developer

May 2026

Independent Project — Big Boss Awning & Canopies | Virtual

- Built and deployed a full-stack commercial web app using Python (Django) and MySQL for a real local business.
- Engineered production asset delivery with WhiteNoise, resolving static file compression issues for live deployment.
- Managed full cloud infrastructure on Render — database migrations, environment variables, production config.
- Integrated XML sitemaps with Google Search Console — 100% URL discovery and live search indexation.

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – 2027

IMR Ghaziabad | Percentage: 69.08%

Senior Secondary (XII) — Science, UP Board

2024

S.G. Public Inter College, Deri Machha, GB Nagar | Percentage: 69.80%

Secondary (X), UP Board

2022

M D H S S, Saddique Nagar, Sihani, Ghaziabad | Percentage: 73.17%

TRAININGS / CERTIFICATIONS

Python Data Analytics

Jan 2026 – Apr 2026

Institute of Management and Research, Ghaziabad

- Mastered core Python, OOP concepts, and exception handling.
- Hands-on experience analyzing and processing datasets programmatically.
- Built interactive visual dashboards using Matplotlib and Plotly.

Full Stack Web Development

Jul 2025 – Present

FreeCodeCamp, Virtual

- Ongoing program covering HTML, CSS, JavaScript, and modern frameworks.

PROJECTS

Big Boss Awning & Canopies ■ bigbossawningandcanopies.onrender.com

May 2026

HTML · CSS · JavaScript · Django · MySQL · Render

- Full-stack commercial web app for a real client, production deployed on Render.
- Configured WhiteNoise for static file delivery and managed database migrations.
- XML sitemaps integrated with Google Search Console — 100% URL discovery.

Interactive UI Experiment ■ hanji-abhay.github.io/you-cant-say-no/valentine.html

Feb 2026

HTML · CSS · JavaScript

- Built a creative frontend web experience focused on dynamic user interaction and fluid animations.
- Used JavaScript DOM manipulation for real-time mouse tracking and element repositioning.
- Responsive CSS layout with smooth transitions across all screen sizes.

Text Analyzer ■ github.com/hanji-abhay/TextAnalyzer

2025

Python · OOP · File Handling

- Python CLI tool for word count, frequency analysis, and text insights.
- Built with clean OOP architecture and file handling for processing any text input.

Library Management System ■

2025

github.com/hanji-abhay/library-management-system-python-mysql

Python · MySQL · OOP

- Full-featured system — book records, member management, issue/return tracking.
- MySQL backend with clean Python OOP structure.

Google Interface Clone ■ hanji-abhay.github.io/google-clone

Nov 2025 – Jan 2026

HTML · CSS · JavaScript

- Pixel-perfect Google homepage clone focusing on UI detail and clean frontend fundamentals.

SKILLS

Frontend	HTML5 · CSS3 · JavaScript · Responsive Design
Backend	Python · Django · MySQL · REST APIs
Python	OOP · File Handling · Exception Handling · Matplotlib · Plotly
Tools	Git · GitHub · VS Code · Render · Google Search Console
