PROFESSIONAL SUMMARY

BCA student graduating in 2027 with hands-on experience designing and building software across full-stack applications, REST APIs, multi-tenant systems, and real-time collaboration. Working knowledge of data structures, algorithms, object-oriented programming, and SQL/NoSQL databases. Seeking an entry-level Software Developer role to contribute to reliable, maintainable applications.

TECHNICAL SKILLS

Programming: JavaScript (ES6+), Python, SQL, C (fundamentals)

Core CS: Data Structures & Algorithms, OOP, problem-solving, sorting, hashing, trees, graphs, dynamic programming

Backend & APIs: Node.js, Express.js, Django, Django REST Framework, REST APIs, JWT authentication, RBAC

Databases: MongoDB, MySQL, PostgreSQL, indexing, transactions, select_for_update()

Frontend: React, Redux Toolkit, Zustand, Vite, Tailwind CSS, HTML5, CSS3

Systems & Tools: Socket.IO, Redis, Git, GitHub, Razorpay, Cloudinary, Google OAuth, Google Calendar API, Vercel, Render

EXPERIENCE

Web Developer Intern — Zaalima Development Pvt. Ltd. | Jul–Sep 2026 · Remote

MERN stack · Socket.IO · Redis · Razorpay · Vercel · Render

- Developed administrator and vendor dashboards for ShopSphere, a multi-tenant e-commerce platform, including analytics and Razorpay payment workflows.
- Used MongoDB compound indexes and Cloudinary CDN to support efficient data queries and media delivery.
- Implemented real-time collaboration features in Orbit using Socket.IO and Redis pub/sub.
- Troubleshot deployment issues across Vercel and Render, including SPA routing, CORS, and API/socket URL configuration.

Web Development Intern — Thiranex | Jul–Aug 2026 · Remote

HTML · CSS · JavaScript · Fetch API

- Built a responsive multi-page portfolio that achieved Lighthouse Accessibility 100 and SEO 100.
- Developed a CRUD to-do application using localStorage and a live weather dashboard using the Fetch API.

Freelance Full-Stack Developer — Big Boss Awning & Canopies | May 2026

Django · MySQL · Render

- Deployed a commercial website using Django and MySQL; configured XML sitemaps and Google Search Console.

SELECTED PROJECTS

TAKSHVID — AI-Assisted EdTech Platform | 2026–Present

React · Redux Toolkit · Node.js · Express · Django REST Framework · MongoDB · PostgreSQL

- Designed a dual-backend architecture, using Node.js/Express for authentication and AI services and Django REST for academic data.
- Integrated Groq, Gemini, OpenRouter, and Cohere behind a provider-agnostic abstraction for the KYVYA AI assistant.

ShopSphere — Multi-Tenant E-Commerce SaaS | 2026

React · Redux Toolkit · Node.js · Express · MongoDB · Razorpay · Live project

- Implemented tenant-aware role-based workflows for administrators, vendors, and customers, with order lifecycle management and Razorpay/Cloudinary integrations.

Orbit — Collaborative Project Management | 2026

React · Zustand · Node.js · Express · MongoDB · Socket.IO · Redis · Live project

- Built Kanban boards with drag-and-drop, priority tags, and activity logs; enabled real-time synchronization through Socket.IO and Redis pub/sub.

Hospital Management System | 2026

Python · Django · MySQL · Google Calendar API

- Implemented two-way Google Calendar appointment synchronization and Django transaction locking with select_for_update() to prevent race-condition double bookings.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) — IMR Ghaziabad | 2024–2027 · Expected

Aggregate through four semesters: 68.46%

Certifications: Web Development Internship — Zaalima Development (Jul–Sep 2026); Web Development Internship — Thiranex (Jul–Aug 2026); Full-Stack Developer Certification — Digital Heroes (Jun 2026).
