PROFILE

Full-stack developer skilled in Python (Django), Node.js/Express, React, MySQL, and MongoDB. Completed one internship and a freelance project; currently interning at Zaalima Development and building TAKSHVID (EdTech AI platform) and CureAI (ML-based cancer detection). Looking for roles where I can work on real features end-to-end.

WORK EXPERIENCE

Web Development Intern — Zaalima Development

Jul 2026 – Present

- Completed ShopSphere — a production-grade multi-tenant e-commerce SaaS using React 19 + Vite, Redux Toolkit, Tailwind CSS, Node.js/Express 5, MongoDB, and JWT auth.
- Engineered Admin & Vendor Dashboards with Recharts analytics and a three-email Nodemailer notification system.
- Integrated Razorpay (payments) and Cloudinary (media); implemented MongoDB compound indexing for query performance.
- Currently building Orbit — a real-time collaborative workspace and Agile management tool (next internship project).

Web Development Intern — Thiranex

Jul 2026 – Aug 2026

- Delivered structured tasks across semantic HTML5, advanced CSS3, responsive architecture, and JavaScript state management.
- Built a multi-page accessible portfolio scoring 100 on Lighthouse Accessibility and SEO audits (WCAG-compliant).
- Developed a client-side To-Do app with full CRUD and localStorage persistence; real-time Weather Dashboard using Fetch API.

Freelance Full-Stack Developer — Big Boss Awning & Canopies

May 2026

- Built and deployed a full-stack commercial web app using Python (Django) and MySQL for a real local business.
- Managed full cloud infrastructure on Render — migrations, env config, WhiteNoise static delivery.
- Integrated Google Search Console XML sitemaps; achieved 100% URL discovery and live search indexation.

PROJECTS

TAKSHVID — EdTech Platform with AI Assistant KYVYA github.com/hanji-abhay/takshvid

2026 – Present

- Full EdTech platform for Indian university students — study materials, coding lab, skill paths, and KYVYA (multi-AI assistant routing across Groq, Gemini, OpenRouter, and Cohere).
- Dual-server backend: Node.js/Express (auth + AI) and Django/DRF (academic data). Three database layers: MongoDB Atlas, PostgreSQL, Cloudinary.
- Auth system fully tested (register, email verify, login, logout, forgot password). Backend complete; frontend in progress.

CureAI — Cancer Detection Platform

2026 – Present

- Group project — ML-based system using a trained classification model to identify cancer patients and assist in early detection from patient data.
- Bridges healthcare and technology; designed to deliver accessible, data-driven diagnostic support.

ShopSphere — Multi-Tenant E-Commerce SaaS shop-sphere-ied7mfmnf-suchit7.vercel.app

2026

- Production-grade SaaS with tenant isolation, role-based access (admin/vendor/customer), and full order lifecycle management.
- React 19 + Vite + Redux Toolkit + Tailwind frontend; Node.js/Express 5 + MongoDB backend; Razorpay payment integration.

Kitaab — Digital Reading Platform

2026

- Beautiful, immersive web-based library for reading timeless classics with dual-page book reader and bookshelf management (Want to Read / Reading / Finished).
- Reading progress tracking, customisable themes & fonts, and reader profile with stats — powered by Project Gutenberg and Open Library APIs.
- Built with HTML5, CSS3, Vanilla JavaScript, Fetch API, and LocalStorage — zero backend dependencies.

Hospital Management System github.com/hanji-abhay/banao-hms

2026

- Full-stack Django + MySQL HMS with serverless Gmail SMTP and Google Calendar API two-way appointment sync.
- Concurrency-safe booking via select_for_update(); resolved PyMySQL compatibility issues and a GitGuardian-flagged credentials vulnerability.

Personal Diary & To-Do App hanji-abhay.github.io/personal-diary-to-do-app

2026

- Zero-dependency vanilla JS app with full CRUD, PIN protection, animated cover, customisable themes, and localStorage persistence.

InternTrack — Internship Application Tracker internship-application-tracker-indol.vercel.app

2026

- Vanilla JS tracker to organise internship applications, statuses, and notes — no framework dependencies.

EDUCATION

Bachelor of Computer Applications (BCA) — IMR Ghaziabad	2024 – 2027 69.08%
Senior Secondary (XII) — Science, UP Board — S.G. Public Inter College	2024 69.80%
Secondary (X), UP Board — M D H S S, Ghaziabad	2022 73.17%

CERTIFICATIONS

Web Development Internship Certificate — Thiranex	20 Jul 2026 – 19 Aug 2026
ID: THX-JUL2026-355 · Verified certificate issued by Hariharan M (Founder & CEO). Successfully completed internship in Web Development.	
Full-Stack Developer Certification — Digital Heroes	Jun 2026
ID: DMH-FS-AM-H21N-ABF2 · Full-stack development, deployment pipelines, Shopify APIs, security practices, and testing methodologies.	
Python Data Analytics — IMR Ghaziabad	Jan – Apr 2026
Core Python, OOP, exception handling; interactive visual dashboards using Matplotlib and Plotly.	
Full Stack Web Development — freeCodeCamp	Jul 2025 – Jun 2026
HTML, CSS, JavaScript, and modern frontend frameworks.	

SKILLS

Frontend	HTML5 · CSS3 · JavaScript (ES6+) · React · Tailwind CSS · Responsive Design
Backend	Python · Django · Node.js · Express.js · REST APIs · JWT Auth
Databases	MySQL · MongoDB · PostgreSQL
AI APIs	Groq API · Gemini API · OpenRouter API · Cohere API
Integrations	Razorpay · Cloudinary · Nodemailer · Google OAuth · Google Calendar API · Gmail SMTP
Tools	Git · GitHub · VS Code · Render · Vercel · Google Search Console

INTERESTS

- Visual Arts & Painting — Created large-scale Radha Krishna and Lakshmi Narayan wall murals; passionate about blending artistic creativity with UI/UX sensibility.
- Web Design — Constantly experimenting with new layouts, animations, and design systems in personal projects.
- Music — Avid listener; uses music as a creative companion during long coding sessions.
